LeakBoard

Your Partner for Water Resource Management

Welcome to LeakBoard, your essential tool for efficient water meter management and leak detection in your water supply systems.

LeakBoard is a comprehensive web solution designed to streamline data collection, analysis, and visualization of your water meters.

Discover potential losses and optimize your operations with LeakBoard..

KEY FEATURES:

Web Portal for Viewing and Analysis

LeakBoard provides you access to all your data through an intuitive web interface, allowing you to monitor water meter performance from the comfort of your browser.

Flexible Access Administration

Control user access based on their roles, including administrative and user roles. An unlimited number of users can collaborate effectively.

Data Retrieval and Analysis of Meters

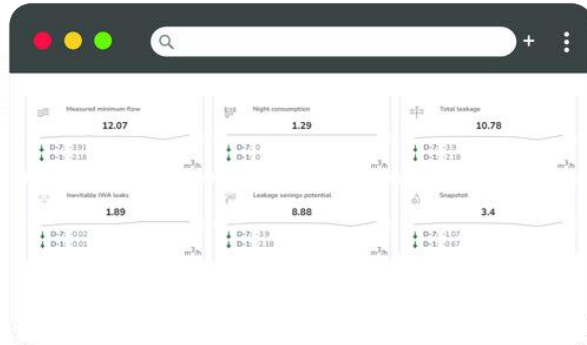

LeakBoard supports data retrieval from Primayer and HWM water meters, enabling in-depth analysis of flow and pressure.

Loss Management

Create DMA zones with specific parameters, monitoring flow and consumption. LeakBoard assists you in detecting and addressing water leaks.

Precise KPI Indicator Analysis

Calculate key KPI indicators such as minimum flow, nighttime consumption, total leakage, potential savings, and many others. Enhance business efficiency with detailed insights.

tables, and maps. Track changes over time and make informed decisions.

Notifications for Swift Response

Stay informed with notifications alerting you to data unavailability or potential meter issues.

Modern Technical Support

A team of experts is available to provide technical support and address all inquiries.
